

MCP 700T

The MCP700T is a labeling system high performance for applying a single label.

Incorporates two heads, to apply a label on the container at double speed, alternating implementation between one and another.

A second possibility offers this Dual head system, only one of them work, being replaced by the other when the labels roll runs out, avoiding stops in the production line.

Supports labels rolls up to 400 mm diameter, giving considerable autonomy.

Includes dual motor step by step, one for drive coil and another for dispenser label.

It also has tables displacement for the labeling heads, with millimetric adjustment through handwheels for easy head adjustment at the time of labeling

The MCP700T is controlled by Touch screen, regulating the speed from it, the labeling time, etc.

CHARACTERISTICS

Production speed: Maximum 19.000 packages per hour.

Dispensing speed: 80 meters per minute as maximum.

Label length size: 12mm - indeterminate.

Label width size: 10mm minimum – 120mm – 205mm maximum according to the model.

External diameter labels: 400mm.

Inside reel diameter: 40 or 76mm.

Motorization: Double step by step motors.

Product size: Ø 20mm - Ø 150mm.

Power supply: 230 V, 50 – 60 Hz.

OPTIONAL:

- Electro-pneumatic system devised to encode products with batch number, expiry date (Hot stamping).
